

NOT A DESK ORIGINAL

Work standing or sitting with a peaceful view.

HOW TO USE IT

Web meetings or phone calls - You have 30% more lung capacity when standing. Set up somewhere quiet so you don't disturb colleagues.

Isolation - If you are distracted, on average it takes 10 minutes to regain concentration.

Email processing - You can process information better at an inspiring workstation.

Difficult conversations - If you are standing, you feel more in control and you have more self-confidence.

Creative workspace in the garden for strategic thinking - If you do what you've always done you will get what you've always got.

Mouse pad - Special mouse pad available for mouse users.

The best way to increase your mental and physical health in the workspace. Flexible furniture for at home and in the office. Let your creativity loose with our products, don't just stick to work, use them for whatever purpose seems fit!

HEALTH IMPROVEMENT

Back and Neck - The codeword in ergonomics is movement, ideally every half hour. Switch between different workstations and work standing for half an hour every now and then.

Heart - People who sit for 10 hours a day are 34% more likely to die prematurely due to heart failure than those who sit for 1 hour a day.

Eyes - Occasional long-distance vision relaxes the eyes and reduces the risk of headaches or tired eyes.

Head - Looking at nature lowers your stress level by 30% and increases creativity.

USP

An extra workstation that takes up no space and can be set up or put away in an instant.

Because the height is determined by the window, you can install it at any height, even sitting height. It is suitable for children from 5 years up to NBA players.

More tax-efficient than other furniture because it is a laptop accessory.

Made from FSC bamboo and recycled plastic, designed in Ghent.

Mount on a window or a tree.

Can be used as a laptop stand.

NOT A DESK ELSEWHERE

Work standing or sitting with a peaceful view.

HOW TO USE IT

Web meetings or phone calls - You have 30% more lung capacity when standing. Set up somewhere quiet so you don't disturb colleagues.

Isolation - If you are distracted, on average it takes 10 minutes to regain concentration.

Email processing - You can process information better at an inspiring workstation.

Difficult conversations - If you are standing, you feel more in control and you have more self-confidence.

Creative workspace in the garden for strategic thinking - If you do what you've always done you will get what you've always got.

Mouse pad - Special mouse pad available for mouse users.

The best way to increase your mental and physical health in the workspace. Flexible furniture for at home and in the office. Let your creativity loose with our products, don't just stick to work, use them for whatever purpose seems fit!

HEALTH IMPROVEMENT

Back and Neck - The codeword in ergonomics is movement, ideally every half hour. Switch between different workstations and work standing for half an hour every now and then.

Heart - People who sit for 10 hours a day are 34% more likely to die prematurely due to heart failure than those who sit for 1 hour a day.

Eyes - Occasional long-distance vision relaxes the eyes and reduces the risk of headaches or tired eyes.

Head - Looking at nature lowers your stress level by 30% and increases creativity.

USP

An extra workstation that takes up no space and can be set up or put away in an instant.

Because the height is determined by the tripod, you can install it at any height, even sitting height.

More tax-efficient than other furniture because it is a laptop accessory.

Made from FSC bamboo and recycled plastic, designed in Ghent.

Can be used by speakers during presentations, or for standing meetings with or without a laptop.

So light and mobile, it can be placed anywhere.

NOT A DESK CHAIR

Work sitting down with a peaceful view or transform any room into a workstation at any moment.

HOW TO USE IT

Meet in public or shared space - It leaves no prints and can be carried on the back (ask for backpack, not included).

Make temporary extra workplaces - Put it in the aisle or bedroom and store it in an instant.

Create a mini-workstation - This can be used for tasks that do not require a large work surface. For example web meetings or writing work, you can easily take it outside to work with a view on nature.

Escape traffic jams - Put it in your car and work on the go to increase your productivity between meetings.

Lunch bench - Assemble 4 units and have lunch outside.

The best way to increase your mental and physical health in the workspace. Flexible furniture for at home and in the office. Let your creativity loose with our products, don't just stick to work, use them for whatever purpose seems fit!

HEALTH IMPROVEMENT

Back and Neck - The codeword in ergonomics is movement, ideally every half hour. Switch between different workstations and work in a different position every half hour. Strong back support on the chAIR.

Eyes - Occasional distant vision relaxes your eyes and reduces the risk of headaches or tired eyes at the end of the day.

Head - A view on nature reduces stress levels by 30% and increases creativity. People who do not have their own enclosed workspace at home suffer the most psychologically from working at home.

USP

An extra workstation that takes up no space and can be set up or put away in an instant. Can be placed anywhere.

No dirty clothes! Thanks to its low weight and compact folding, it can be stored inside and does not get dirty like garden furniture.

Easy to store, you can store 20 workstations on 1 square metre so that when it is busy you can still give everyone a space to work.

No cold materials, because the places where your skin comes into contact are made of wood, it will be pleasant to stay there even in colder weather.

NOT A DESK LAMP

The most suitable light for every task and during every time of day, with a built-in mobile phone charger.

HOW TO USE IT

Presentations, meetings, reading - Spotlight during presentations, meetings or as a reading light and everything in between.

Energy increase - The morning mode in the lamp mimics natural sunlight and will cause certain substances in your body to be produced less or more, allowing you to start the day with more positive energy and also allowing you to concentrate better.

Built-in charger - This is designed according to a standardised protocol so any smartphone that has this option can be inductively charged.

Structure - The ability to change the lighting during the day allows you to divide the day into different parts, giving you structure.

Any time of day - Thanks to the three different colours the light can be adjusted to any moment of the day. You can also dim it as you feel fit.

The best way to increase your mental and physical health in the workspace. Flexible furniture for at home and in the office. Let your creativity loose with our products, don't just stick to work, use them for whatever purpose seems fit!

HEALTH IMPROVEMENT

Head - During dark days, light stimulates your biorhythm and thus your mood. It increases productivity. White light is recommended in the morning to increase your energy level while orange light makes you sleep better.

Traditional lighting is mounted above the user so a shadow of the eyebrows rests over the eyes, making it difficult to read the user's face. With this lamp, facial expressions can be correctly displayed at low intensity and with the best colour temperature. This gives you a better feeling while in a meeting.

Eyes - Reading in dim lighting requires more effort and can lead to tired eyes or headaches.

USP

The lamp offers three different colours and the light intensity can be continuously adjusted. White light is recommended in the morning to increase your energy level while orange light makes you sleep better.

Light can be directed in any direction and height thanks to the metal fixture with three independent hinges.

14 individual LEDs with a special lens ensure the light is spread evenly and you do not have individual focal points on your table surface.

The LED technology provides more light than a traditional lamp and uses five times less energy.

NOT A DESK WHITEBOARD

Save space in meeting rooms or create your own meeting room anywhere.

HOW TO USE IT

Brainstorm during long or short meetings - Put the information on the board so you can discuss thoroughly and come to a conclusion during the meeting itself.

Increase creativity - It is important to have as many impromptu physical meetings as possible between employees. Creativity is rarely achieved alone, plus these encounters improve the flow of communication and increase energy in the building.

More space - Replacing the three legs of an original whiteboard and mounting the sign to the glass frees up space for an additional chair.

Landscape mode - It can also be used as a projection screen.

"If you always do what you always did, you'll always get what you always got" - Do your brainstorming session outside and come to new insights (ask for tree-clip, not included).

The best way to increase your mental and physical health in the workspace. Flexible furniture for at home and in the office. Let your creativity loose with our products, don't just stick to work, use them for whatever purpose seems fit!

HEALTH IMPROVEMENT

Back and Neck - A standing meeting, like a standing desk, breaks sedentary behaviour and is good for your neck, back and heart. The codeword in ergonomics is movement, ideally every half hour.

Head - Drawing strengthens your cognitive functions. You can recognise patterns more easily and it makes you happy. Physical meetings are physically and mentally less tiring than digital meetings.

Eyes - Because the board is larger than a laptop screen, you can magnify details which is less tiring for your eyes.

USP

Low weight, so it can easily be carried with one arm.

Landscape orientation makes it easier to write on than a traditional whiteboard or flipchart with three legs.

Can be placed on the table by itself, e.g. to create mind maps while sitting down.

The whiteboard is slightly tilted towards the user which increases the ergonomics.

Mount a whiteboard in your glass meeting room without using screws.

Possibility to order a clip that allows you to attach the board to a tree outside.
